PROJECTS

Music.io ~ Music Player App

React JS | Tailwind CSS | Rapid API | Context API

- Developed a music player application using **ReactJs** and **Context API** for state management, **Tailwind CSS** for UI design, and **RapidAPI** for fetching songs data.
- Utilized **Context API** for efficient and centralized state management of the application.

Tube.io ~ Youtube Clone

React JS | Tailwind CSS | Rapid API

- Developed a YouTube clone application using **ReactJS**, **Tailwind CSS**, and **RapidAPI** that allows users to search and watch YouTube videos.
- Utilized **Tailwind CSS** for styling and **RapidAPI** for data fetching, making the application visually appealing and efficient in retrieving videos.

Amazon Prime Clone

ReactJS | Tailwind | Redux | Firebase | Firestore

- Utilized **Firebase** for user authentication and **Firestore** as a real-time database, providing a secure and seamless user experience.
- Implemented **Redux** for state management and **Tailwind CSS** for styling.

Ecommerce Store

NextJS | Tailwind | Sanity | Stripe

- Developed an Ecommerce store using **NextJS** and **Tailwind CSS**, providing a modern and visually appealing user interface.
- Utilized **Sanity** as the dynamic database, allowing for easy management of products by the store owner.
- Integrated **Stripe** for seamless and secure handling of online payments.

NFT Marketplace

Solidity | Hardhat | Ethers JS | The Graph

- Developed a NFT marketplace application using **NextJS** for frontend and **Solidity** to write smart contract, and **Hardhat** for testing and deployment of the contract.
- Users can list their NFTs and purchase listed NFTs from the marketplace and also withdraw their funds.

SKILLS

Languages

- HTML
- CSS
- JavaScript
- Solidity

Libraries

- React
- Redux

Others

- Next JS
- Context API
- Tailwind
- Blockchain
- Hardhat
- Ethers JS

CERTIFICATIONS

Web Development Bootcamp by Angela Yu

MongoDB, React JS, Node JS,
Express JS, Vanilla JS, Blockchain
